Biophysical Chemistry 65 (1997) 237–240

Biophysical Chemistry

Subject Index to Volume 65

Aggregation
Diffusion; Hydration; Parvalbumin; Pulsed field gradient NMR (Price, W.S. (65) 179)

Alternative initiation pathway
Complement; Minimal model; Steady state approximation (Juang, E. (65) 143)

AM1
Amphotericin B; Conformational analysis; Molecular mechanics; MM2; NMR nuclear Overhauser effects (Baginski, M. (65) 91)

Amphotericin B
Conformational analysis; Molecular mechanics; MM2; AM1; NMR nuclear Overhauser effects (Baginski, M. (65) 91)

Antibody–antigen, analyte–receptor, and analyte–receptorless (protein) systems
Binding kinetics; Diffusion; Fractal surfaces (Sadana, A. (65) 29)

ATPase
ATP; Dimerization; Light scattering; Myosin subfragment 1 (Claire, K. (65) 85)

ATP
ATPase; Dimerization; Light scattering; Myosin subfragment 1 (Claire, K. (65) 85)

Bending moduli
Tubular membrane; Peristaltic state; Pearling instability (Suezaki, Y. (65) 101)

Bilayers
FT–IR spectroscopy; Secondary structure; Conformational transition; Peptides (Boden, N. (65) 205)

Binding kinetics
Antibody–antigen, analyte–receptor, and analyte–receptorless (protein) systems; Diffusion; Fractal surfaces (Sadana, A. (65) 29)

Biopolymers
Protein folding; Spin systems; Monte Carlo; Simulation; Frustration; Two-state transition (Kikuchi, T. (65) 109)

β-carotene
Chlorophyll; Nematic liquid crystal; Photocurrent; Photopotential (Ptak, A. (65) 165)

Chlorophyll
β-carotene; Nematic liquid crystal; Photocurrent; Photopotential (Ptak, A. (65) 165)

Complement
Alternative initiation pathway; Minimal model; Steady state approximation (Juang, E. (65) 143)

Conformational analysis
Amphotericin B; Molecular mechanics; MM2; AM1; NMR nuclear Overhauser effects (Baginski, M. (65) 91)

Conformational transition
FT–IR spectroscopy; Secondary structure; Bilayers; Peptides (Boden, N. (65) 205)

Conformational transitions
Reaction rate theory; Enzymatic catalysis; Protein dynamics; Protein machine model (Kurzyński, M. (65) 1)

Dielectric constant
Secondary structures; Membrane proteins; Non-aqueous solvents; Solvent polarity; Spectroscopy (Chen, Y. (65) 65)

Diffusion
Aggregation; Hydration; Parvalbumin; Pulsed field gradient NMR (Price, W.S. (65) 179)

Antibody–antigen, analyte–receptor, and analyte–receptorless (protein) systems; Binding kinetics; Fractal surfaces (Sadana, A. (65) 29)

Dimerization
ATP; ATPase; Light scattering; Myosin subfragment 1 (Claire, K. (65) 85)

Dye fluorescence lifetime
Phenazines; Dye–nucleic acid interaction; Polarized fluorescence (Zozulya, V. (65) 55)

Dye–nucleic acid interaction
Phenazines; Polarized fluorescence; Dye fluorescence lifetime (Zozulya, V. (65) 55)

Electrostatics
Fluctuations; Internal water; Protonation; Poisson–Boltzmann; FDPB method (Sandberg, L. (65) 189)

Enzymatic catalysis
Reaction rate theory; Protein dynamics; Conformational transitions; Protein machine model (Kurzyński, M. (65) 1)

(−)-Epigallocatechin gallate
Protein kinase C; Protein phosphatase 2A; Lipid membrane; Tumor promotion; 12-*O*-tetradecanoylphorbol-13-acetate; Okadaic acid (Kitano, K. (65) 157)

FDPB method
Electrostatics; Fluctuations; Internal water; Protonation; Poisson–Boltzmann (Sandberg, L. (65) 189)

Fluctuations
Electrostatics; Internal water; Protonation; Poisson–Boltzmann; FDPB method (Sandberg, L. (65) 189)

Fluorescence decay time-resolved emission
Protein conformation; Protein folding; Structural intermediates (Guptasarma, P. (65) 221)

Fractal surfaces
Antibody–antigen, analyte–receptor, and analyte–receptorless (protein) systems; Binding kinetics; Diffusion (Sadana, A. (65) 29)

Fructose
Sucrose; Glucose; Invertase; Respiration; Glycolysis; Starch degradation; Potatoes (Marangoni, A.G. (65) 211)

Frustration
Biopolymers; Protein folding; Spin systems; Monte Carlo; Simulation; Two-state transition (Kikuchi, T. (65) 109)

FT–IR spectroscopy
Secondary structure; Conformational transition; Bilayers; Peptides (Boden, N. (65) 205)

Glucose
Sucrose; Fructose; Invertase; Respiration; Glycolysis; Starch degradation; Potatoes (Marangoni, A.G. (65) 211)

Glycolysis
Sucrose; Glucose; Fructose; Invertase; Respiration; Starch degradation; Potatoes (Marangoni, A.G. (65) 211)

Gramicidin
Model channel; Polarizability; Membrane fluidity (Duca, K.A. (65) 123)

Human serum albumin
Nonideal solutions; Small-angle neutron scattering; Monte Carlo simulation (Sjöberg, B. (65) 75)

Hydration
Aggregation; Diffusion; Parvalbumin; Pulsed field gradient NMR (Price, W.S. (65) 179)

Interdigitated gel phase
Phospholipid membranes; Phase transition; X-ray diffraction; Osmotic stress; Poly(ethylene glycol) (Hatanaka, Y. (65) 229)

Internal water
Electrostatics; Fluctuations; Protonation; Poisson–Boltzmann; FDPB method (Sandberg, L. (65) 189)

Invertase
Sucrose; Glucose; Fructose; Respiration; Glycolysis; Starch degradation; Potatoes (Marangoni, A.G. (65) 211)

Light scattering
ATP; ATPase; Dimerization; Myosin subfragment 1 (Claire, K. (65) 85)

Lipid membrane
(−)-Epigallocatechin gallate; Protein kinase C; Protein phosphatase 2A; Tumor promotion; 12-*O*-tetradecanoylphorbol-13-acetate; Okadaic acid (Kitano, K. (65) 157)

Membrane fluidity
Model channel; Gramicidin; Polarizability (Duca, K.A. (65) 123)

Membrane proteins
Secondary structures; Non-aqueous solvents; Dielectric constant; Solvent polarity; Spectroscopy (Chen, Y. (65) 65)

Minimal model
Alternative initiation pathway; Complement; Steady state approximation (Juang, E. (65) 143)

Mixed-mode oscillations
Self-replicating dimerization mechanism (Peacock-López, E. (65) 171)

MM2
Amphotericin B; Conformational analysis; Molecular mechanics; AM1; NMR nuclear Overhauser effects (Baginski, M. (65) 91)

Model channel
Gramicidin; Polarizability; Membrane fluidity (Duca, K.A. (65) 123)

Molecular mechanics
Amphotericin B; Conformational analysis; MM2; AM1; NMR nuclear Overhauser effects (Baginski, M. (65) 91)

Monte Carlo simulation
Nonideal solutions; Small-angle neutron scattering; Human serum albumin (Sjöberg, B. (65) 75)

Monte Carlo
Biopolymers; Protein folding; Spin systems; Simulation; Frustration; Two-state transition (Kikuchi, T. (65) 109)

Myosin subfragment 1
ATP; ATPase; Dimerization; Light scattering (Claire, K. (65) 85)

Nematic liquid crystal
β-carotene; Chlorophyll; Photocurrent; Photopotential (Ptak, A. (65) 165)

NMR nuclear Overhauser effects
Amphotericin B; Conformational analysis; Molecular mechanics; MM2; AM1 (Baginski, M. (65) 91)

Non-aqueous solvents
Secondary structures; Membrane proteins; Dielectric constant; Solvent polarity; Spectroscopy (Chen, Y. (65) 65)

Nonideal solutions
Small-angle neutron scattering; Monte Carlo simulation; Human serum albumin (Sjöberg, B. (65) 75)

Okadaic acid
(−)-Epigallocatechin gallate; Protein kinase C; Protein phosphatase 2A; Lipid membrane; Tumor promotion; 12-*O*-tetradecanoylphorbol-13-acetate (Kitano, K. (65) 157)

Osmotic stress
Interdigitated gel phase; Phospholipid membranes; Phase transition; X-ray diffraction; Poly(ethylene glycol) (Hatanaka, Y. (65) 229)

12-*O*-tetradecanoylphorbol-13-acetate
(−)-Epigallocatechin gallate; Protein kinase C; Protein phosphatase 2A; Lipid membrane; Tumor promotion; Okadaic acid (Kitano, K. (65) 157)

Parvalbumin
Aggregation; Diffusion; Hydration; Pulsed field gradient NMR (Price, W.S. (65) 179)

Pearling instability
Tubular membrane; Bending moduli; Peristaltic state (Suezaki, Y. (65) 101)

Peptides
FT–IR spectroscopy; Secondary structure; Conformational transition; Bilayers (Boden, N. (65) 205)

Peristaltic state
Tubular membrane; Bending moduli; Pearling instability (Suezaki, Y. (65) 101)

Phase transition
Interdigitated gel phase; Phospholipid membranes; X-ray diffraction; Osmotic stress; Poly(ethylene glycol) (Hatanaka, Y. (65) 229)

Phenazines
Dye–nucleic acid interaction; Polarized fluorescence; Dye fluorescence lifetime (Zozulya, V. (65) 55)

Phospholipid membranes
Interdigitated gel phase; Phase transition; X-ray diffraction; Osmotic stress; Poly(ethylene glycol) (Hatanaka, Y. (65) 229)

Photocurrent
β-carotene; Chlorophyll; Nematic liquid crystal; Photopotential (Ptak, A. (65) 165)

Photopotential
β-carotene; Chlorophyll; Nematic liquid crystal; Photocurrent (Ptak, A. (65) 165)

Poisson–Boltzmann
Electrostatics; Fluctuations; Internal water; Protonation; FDPB method (Sandberg, L. (65) 189)

Polarizability
Model channel; Gramicidin; Membrane fluidity (Duca, K.A. (65) 123)

Polarized fluorescence
Phenazines; Dye–nucleic acid interaction; Dye fluorescence lifetime (Zozulya, V. (65) 55)

Poly(ethylene glycol)
Interdigitated gel phase; Phospholipid membranes; Phase transition; X-ray diffraction; Osmotic stress (Hatanaka, Y. (65) 229)

Potatoes
Sucrose; Glucose; Fructose; Invertase; Respiration; Glycolysis; Starch degradation (Marangoni, A.G. (65) 211)

Protein conformation
Fluorescence decay time-resolved emission; Protein folding; Structural intermediates (Guptasarma, P. (65) 221)

Protein dynamics
Reaction rate theory; Enzymatic catalysis; Conformational transitions; Protein machine model (Kurzyński, M. (65) 1)

Protein folding
Biopolymers; Spin systems; Monte Carlo; Simulation; Frustration; Two-state transition (Kikuchi, T. (65) 109)

Fluorescence decay time-resolved emission; Protein conformation; Structural intermediates (Guptasarma, P. (65) 221)

Protein kinase C
(−)-Epigallocatechin gallate; Protein phosphatase 2A; Lipid membrane; Tumor promotion; 12-*O*-tetradecanoylphorbol-13-acetate; Okadaic acid (Kitano, K. (65) 157)

Protein machine model
Reaction rate theory; Enzymatic catalysis; Protein dynamics; Conformational transitions (Kurzyński, M. (65) 1)

Protein phosphatase 2A
(−)-Epigallocatechin gallate; Protein kinase C; Lipid membrane; Tumor promotion; 12-*O*-tetradecanoylphorbol-13-acetate; Okadaic acid (Kitano, K. (65) 157)

Protonation
Electrostatics; Fluctuations; Internal water; Poisson–Boltzmann; FDPB method (Sandberg, L. (65) 189)

Pulsed field gradient NMR
Aggregation; Diffusion; Hydration; Parvalbumin (Price, W.S. (65) 179)

Reaction rate theory
Enzymatic catalysis; Protein dynamics; Conformational transitions; Protein machine model (Kurzyński, M. (65) 1)

Respiration
Sucrose; Glucose; Fructose; Invertase; Glycolysis; Starch degradation; Potatoes (Marangoni, A.G. (65) 211)

Secondary structure
FT–IR spectroscopy; Conformational transition; Bilayers; Peptides (Boden, N. (65) 205)

Secondary structures
Membrane proteins; Non-aqueous solvents; Dielectric constant; Solvent polarity; Spectroscopy (Chen, Y. (65) 65)

Self-replicating dimerization mechanism
Mixed-mode oscillations (Peacock-López, E. (65) 171)

Simulation
Biopolymers; Protein folding; Spin systems; Monte Carlo; Frustration; Two-state transition (Kikuchi, T. (65) 109)

Small-angle neutron scattering
Nonideal solutions; Monte Carlo simulation; Human serum albumin (Sjöberg, B. (65) 75)

Solvent influence
X-ray scattering; Surface integration (Soda, K. (65) 45)

Solvent polarity
Secondary structures; Membrane proteins; Non-aqueous solvents; Dielectric constant; Spectroscopy (Chen, Y. (65) 65)

Spectroscopy
Secondary structures; Membrane proteins; Non-aqueous solvents; Dielectric constant; Solvent polarity (Chen, Y. (65) 65)

Spin systems
Biopolymers; Protein folding; Monte Carlo; Simulation; Frustration; Two-state transition (Kikuchi, T. (65) 109)

Starch degradation
Sucrose; Glucose; Fructose; Invertase; Respiration; Glycolysis; Potatoes (Marangoni, A.G. (65) 211)

Steady state approximation
Alternative initiation pathway; Complement; Minimal model (Juang, E. (65) 143)

Structural intermediates
Fluorescence decay time-resolved emission; Protein conformation; Protein folding (Guptasarma, P. (65) 221)

Sucrose
Glucose; Fructose; Invertase; Respiration; Glycolysis; Starch degradation; Potatoes (Marangoni, A.G. (65) 211)

Surface integration
X-ray scattering; Solvent influence (Soda, K. (65) 45)

Tubular membrane
Bending moduli; Peristaltic state; Pearling instability (Suezaki, Y. (65) 101)

Tumor promotion
(−)-Epigallocatechin gallate; Protein kinase C; Protein phosphatase 2A; Lipid membrane; 12-*O*-tetradecanoylphorbol-13-acetate; Okadaic acid (Kitano, K. (65) 157)

Two-state transition
Biopolymers; Protein folding; Spin systems; Monte Carlo; Simulation; Frustration (Kikuchi, T. (65) 109)

X-ray diffraction
Interdigitated gel phase; Phospholipid membranes; Phase transition; Osmotic stress; Poly(ethylene glycol) (Hatanaka, Y. (65) 229)

X-ray scattering
Solvent influence; Surface integration (Soda, K. (65) 45)
